

Dear BRC users

RIKEN BRC Experimental Plant Division is emailing you to get your attention on our resource distribution. Your inquiry about any item in the announcement is always welcome.

1. New Stock: Mutants and Transgenic Lines

We added 130 seed lines to the web catalog, Exp-Plant Catalog (https://plant.rtc.riken.jp/resource/psi/psi_list.html). The wording of "In preparation" in the list shows that seeds are available in future. We would appreciate your patience.

Another type of MTA must be executed for the lines developed through genome editing technology. They are psi00256, psi00257, psi00302, psi00303, psi00304, psi00308 and the series of psi10001-10049.

2. Shipping plant cells after the New Year Holidays

As announced on RIKEN BRC website (https://web.brc.riken.jp/en/archives/news/20201217_02), we resumed our business from January 4. We restart shipping plant cells from January 18. Please be informed that setting a schedule to ship plant cells takes more time than you might think. That is affected by the growing state of the plant cells, delayed arrival of the required documents and the lack of complete documents.

We would appreciate your consideration on some time-consuming arrangement which is required in those cases.

Best Regards
