

Dear BRC users

RIKEN BRC Experimental Plant Division is emailing you to get your attention on our resource distribution. Your inquiry about any item in the announcement is always welcome.

1. Shipping and Receiving Orders

Shipment

We have had to reschedule or postpone shipping orders, due to unstable postal condition announced by JP Post. We would appreciate your understanding our last-minute notice given such sudden changes on their announcement.

Smooth Customs Clearance

Being prepared for required documents and arrangements make customs clearance sure thing. Please consult your government officers about required procedures to import biological materials from Japan. We would like to learn more about case-by-case matters to accumulate our experiences and would like to avoid biological resources from destroyed or deteriorated at customs inspections.

2. Publication of TF-GR lines

Recently, development of Arabidopsis transcription factor-glucocorticoid receptor (TF-GR) lines was reported. (Shimada S et al. Plant J. doi: [10.1111/tpj.15796](https://doi.org/10.1111/tpj.15796). PMID: [35510416](https://pubmed.ncbi.nlm.nih.gov/35510416/))

The authors deposited the lines with RIKEN BRC. If you have interests in this resource, please contact us by E-mail (plant.brc@riken.jp).

Best Regards
