

Dear BRC users

RIKEN BRC Experimental Plant Division is emailing you to get your attention on our resource distribution. Your inquiry about any item in the announcement is always welcome.

1. Shipping schedule of plant cell lines due to annual genotyping tests

The Experimental Plant Division conducts genotyping tests once a year for authenticating plant cell lines.

We provide plant cell cultures that have passed the genotyping tests within one year.

We will conduct genotyping tests in this November.

The shipping schedule may be delayed in early November.

We apologize for the inconvenience and appreciate your understanding.

2. For safer and smooth customs clearance of plant materials

It has been our experience that the import regulations have been tightened by the authorities in each country. We appreciate your attention in researching the latest regulations in your country for safer and smoother customs clearance and delivery. We would be grateful if you could share this information with your colleagues not only at RIKEN BRC.

Best Regards
